## IMPREGNATED ACTIVATED CARBON

COC-Formisorb is an impregnated activated carbon for formaldehyde removal. High quality steam activated carbon is chemically impregnated with reactive compounds.

Displaying high density, superior hardness, large pore volume and excellent loading capacity, COC-Formisorb enables exceptional filtration performance.

COC-Formisorb has been developed for the removal of airborne pollutants including formaldehyde. COC-Formisorb is chromium and halogen free making it safe and easy to handle using common industry practice.
